

POLLBOOK FAQS

1. I have been registered for over twenty years! When I went to vote, my record did not come up when they scanned my driver's license. Why?

- Only over the past 10 years or so, has the Delaware Elections voter registration system captured driver's license and state ID numbers. If you have not updated your record in a while, your number may not be on file. You may add your number to your record anytime by calling the Department or completing a voter registration form at iVote.de.gov.

2. Even when they entered my name in the pollbook, my record did not immediately appear. They eventually found me. Why did this happen?

- Often, if your name does not match the name on your voter registration file (hyphenated vs. non-hyphenated, or recent name change), it may take some time to find your voter record on the pollbook. You will be able to update your name at the Polling Place, but we encourage you to update it before Election Day so you will not run into this issue. You may do so at iVote.de.gov or by filling out a paper form available at our offices, for download from our website elections.delaware.gov, or by requesting Elections mail one to you.

3. After I have voted, what is stopping me from going to another polling place and voting there, too?

- When you sign the pollbook and are issued an activation card, the fact that you are voting is updated in the pollbook and system. When you try to vote at another polling place, the pollbook will indicate you have already voted.
- Voting more than once, or even attempting to vote more than once, is voter fraud in Delaware, per Title 15, *Del. C.* § 5128 and will be prosecuted. The penalties for fraudulent voting, "fined not less than $50 or more than $200, or imprisoned not less than 30 days or more than 2 years, or both."
